-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1731

The restriction requirement and election of species requirement is repeated and made Final. Applicant states that claims 5, 6, 15 and 15 read on the elected the species. Claims 1-4, 7-14 and 17-20 are withdrawn from consideration as being drawn to the non-elected species.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 6, 15 and 16 rejected under 35 U.S.C. 103(a) as being unpatentable over AHLUWALIA (5,032,224) in view of WO 97/06304 (equivalent 6,248,209 is being relied on as a translation) and HOLTON(4,012,280).

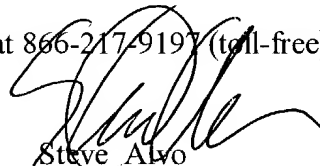

AHLUWALIA teaches using nonionic and anionic surfactants (abstract) including sulfo alkyl esters (columns 3 and 4) and EO-PO polymers (abstract) and anthraquinone (Table I) as additives in kraft pulping. WO 97/06304 teaches using isodecyl-O-(PO)₁-(EO)₁₀-H as the non-ionic surfactant in the delignification of lignocellulosic material. It would have been prima facie obvious to substitute the isodecyl-O-(PO)₁-(EO)₁₀-H anionic surfactant of WO 97/06304 for the anionic EO-PO surfactant of AHLUWALIA as they are used for the same purpose of enhancing the delignification of lignocellulosic material. HOLYON teaches various quinone type additives including anthracene and anthraquinone and teaches that the additives can be used in polysulfide pulping liquors (see HOLTON, Table III). It would have been obvious to the artisan that the anthraquinone pulping additive of AHLUWALIA could be used as an additive in polysulfide liquors as taught by HOLTON.
